Fax: +49 (0) 45 32 / 289-2253

### 1.1.5 About this guide

This guide is intended to assist you with the migration of a central NORDAC PRO SK 5xxE frequency inverter from Getriebbau NORD GmbH & Co. KG to the latest SK 5xxP product series. It is intended for qualified electricians who plan, install and set up a migration. The information in this guide assumes that the qualified electricians who are entrusted with this work are familiar with the NORDAC PRO technology and functionalities, the available field bus systems and modules, as well as with the used accessory components.

This guide only contains information and descriptions for NORDAC PRO frequency inverters, optional modules and accessories from Getriebbau NORD GmbH & Co. KG.

### 1.2 Other applicable documents

This guide is only valid in combination with the technical information for the used modules and accessory components, and the operating instructions of the used frequency inverter. Only these documents contain all the information that is required for the migration. A list of these documents can be found in  Section 5 "Additional information".

The "Technical information" (TI) of the modules and accessory components, as well as the manuals (BU) of the NORD frequency inverters can be found at [www.nord.com](http://www.nord.com).

## 1.3 Display conventions

### 1.3.1 Other information

#### Information

Indicates hints for use and especially important information to ensure reliability of operation.

---

### 1.3.2 Text markings

The following markings are used to differentiate between various types of information:

#### Text

Type of information	Example	Marking
Instructions	1. 2.	Instructions whose sequence must be complied with are numbered sequentially.
Bullet points	•	Bullet points are marked with a dot.
Parameters	<b>P850</b>	Parameters are indicated by a "P" prefix, a three-digit number and bold lettering.
Factory settings	{ 0.0 }	Factory settings are indicated by curly brackets.

#### Symbols used

Type of information	Example	Marking
Cross-reference	📖 Chapter 5.1.1 "Manuals"	Internal cross-reference: A mouse click on the text calls up the stated point in the document.
	📖 Target link	External cross-reference
Hyperlink	<a href="http://www.nord.com/">http://www.nord.com/</a>	References to external websites are indicated in blue and underlined. A mouse click calls up the website.

### 1.3.3 Trademarks

For mentioning registered trademarks and logos within this guide, the following are listed:

#### Field bus systems

Trademarks	Logo	User association
PROFIBUS DP®		PROFIBUS Nutzerorganisation e.V. (PNO) Umbrella association PROFIBUS & PROFINET International (PI)
PROFINET®		
CANopen®		CAN in Automation (CiA)
DeviceNet®		Open DeviceNet Vendors Association (ODVA) Trade and standard development organisation
EtherNet/IP™		
EtherCAT®		EtherCAT Technology Group
POWERLINK		ETHERNET POWERLINK Standardization Group

#### Communication systems

Trademarks	Logo	Organisation
Bluetooth®		Bluetooth Special Interest Group (SIG)

## 2 Migration

### 2.1 NORDAC PRO

This guide serves the migration of drive electronics of the NORDAC PRO product family. The products for the SK 5xxE control cabinet frequency inverters are compared to those of the new SK 5xxP series.

The following products, fields and topics will be considered for the migration:

- Device types and sizes
- Device functions and device characteristics
- Field bus systems and bus interfaces
- Hardware ports and interfaces
- Control and parametrisation options
- Software and options
- Accessory components

Both series basically have the same structure. Structure, performance and range of functions of the new SK 5xxP frequency inverters have been essentially enhanced. For market launch in March 2020, the new NORDAC PRO of type SK 5xxP was sold in sizes 1 – 3, i.e. for motors with nominal powers of 0.25 kW – 5.5 kW. From mid-2022, the devices of sizes 4+5, i.e. for motors with nominal powers 7.5 kW – 22.0 kW, will be available. All device sizes are available with different performance levels (configuration levels).

The 1 ~ 230 V and 3 ~ 400 V frequency inverter types of the most common device or configuration versions are compared. In the following, only those functions and solutions will be considered that could also be implemented through the SK 5xxE. The detailed description of available options and features only considers the most common ones.

**Illustration 1: System overview of NORDAC PRO products**

The NORDAC PRO MI 0500 migration guide compares the optional accessory components for both series.

## 2.2 Device characteristics

The NORDAC PRO SK 5xxE series is available in 10 different performance levels (SK 500E, SK 505E, SK 510E, SK 511E, SK 515E, SK 520E, SK 530E, SK 535E, SK 540E, SK 545E). A differentiation is made between the SK 5x0E and SK 5x5E device types. These are subdivided into 11 sizes, and available with rated powers from 0.25 – 160 kW.

The NORDAC PRO SK 5xxP device series provides four different performance levels (SK 500P, SK 510P, SK 530P, SK 550P). They are differentiated into two device versions.

- Basic Drive SK 500P
- Advanced Drive SK 530P

The SK 5xxP devices are subdivided into 5 sizes, and available with rated powers from 0.25 – 22.0 kW.

Comparing both NORDAC PRO device series shows some deviations that are differentiated below.

### 2.2.1 Mains connection data

#### Mains connection and EMC line filter

Mains phases / Mains voltages		SK 5xxE Device version										SK 5xxP Device version			
		SK 500E	SK 505E	SK 510E	SK 511E	SK 515E	SK 520E	SK 530E	SK 535E	SK 540E	SK 545E	SK 500P	SK 510P	SK 530P	SK 550P
Connection data	1~ 115 V devices SK ...-xxx-112-O	✓	✓	✓	✓		✓	✓	✓	✓	✓				
	1~ 230 V devices SK ...-xxx-123-A	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓	✓	✓	✓
	3~ 230 V devices SK ...-xxx-323-A	✓	✓	✓	✓		✓	✓	✓	✓	✓				
	3~ 400 V devices SK ...-xxx-340-A	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Table 1: Overview of mains connection data and EMC line filters

#### Information

For SK 5xxE, the 1~ 115 V devices are generally equipped without an integrated line filter and available with the SK 5xxE-...-...-O identifier. Further SK 5xxE device versions are partially available as a special version without an integrated line filter.

The SK 5xxP device versions are only available with an integrated line filter and with the SK 5xxP-...-...-A identifier.

## 2.2.2 Characteristics and functions

### Functionalities

Characteristics	Features / Functions	SK 5xxE Device version									SK 5xxP Device version				
		SK 500E	SK 505E	SK 510E	SK 511E	SK 515E	SK 520E	SK 530E	SK 535E	SK 540E	SK 545E	SK 500P	SK 510P	SK 530P	SK 550P
		Basic	Advanced												
	External heat sink technology (sizes 1 + 2) SK TH1-1 and SK TH1-2	✓	✓	✓	✓		✓	✓	✓	✓	✓				
	Top-hat rail mounting (sizes 1 + 2) SK DRK1-1 and SK DRK1-2	✓	✓	✓	✓		✓	✓	✓	✓	✓				
	Cold plate technology	✓	✓	✓	✓		✓	✓	✓	✓	✓				
	Internal 24 V DC power supply unit	✓		✓	✓	✓	✓	✓		✓	-	✓	✓	✓	✓
	External 24 V DC supply		✓			✓		✓		✓				✓	✓

**Important: Please note the detailed description of the control terminals in the manual.**

## 2.4 Modules and options

The following overview tables list the SK TU3...(-24V) technology units of the SK 5xxE, and compare them to the functionalities or options of the SK 5xxP.

### 2.4.1 Field bus interfaces

SK 5xxE		Bus system Connection	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
SK TU3-IBS 275 900 065		 2 x SUB-D9		Not available
SK TU3-PBR 275 900 030		 1 x SUB-D9		Not available
SK TU3-PBR-24V 275 900 160		 1 x SUB-D9 24 V DC		Not available
SK TU3-CAO 275 900 075		 1 x SUB-D9		on board 275 29x xxx
SK TU3-DEV 275 900 085		 5-pole screw terminals		Not available
SK TU3-AS1 275 900 170		 5-pole and 8-pole screw terminals		Not available

Table 9: Technology units SK TU3...(-24V) field bus interfaces

## Information

For detailed information, please refer to the  5.1.1 "Manuals" supplementary manuals on the field bus interface.

### 2.4.2 Ethernet-based bus interfaces

Only the frequency inverter of the SK 550P device version is equipped with an integrated bus interface for the connection of the Ethernet-based field bus systems:

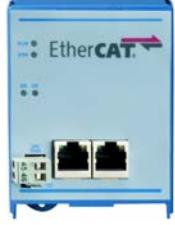

SK 5xxE		Bus system Connection	SK 550P	
Designation Part No.	Product		Product	Designation Part No.
SK TU3-ECT 275 900 180		EtherCAT®  2 x RJ45 24 V DC		on board 275 295 xxx
SK TU3-EIP 275 900 150		EtherNet/IP®  2 x RJ45 24 V DC		on board 275 295 xxx
SK TU3-POL 275 900 140		ETHERNET POWERLINK  2 x RJ45 24 V DC		on board 275 295 xxx
SK TU3-PNT 275 900 190		PROFINET®  2 x RJ45 24 V DC		on board 275 295 xxx

Table 10: Technology units SK TU3... Ethernet-based bus interfaces

## Information

For the SK 550P, the field bus protocol to be used is selected via the dialect's function setting in the *Changing the bus protocol* parameter.

For detailed information, please refer to the  5.1.1 "Manuals" supplementary manuals on the bus interface.

## 2.5 Functional safety (STO, SS1)

### 2.5.1 On board functionality

For the SK 510E, SK 511E, SK 530E, SK 535E, SK 540E and SK 545E performance levels, the functional safety is integrated in the device for the 230 V and 400 V mains voltages. This integrated function variant is only available for the SK 510P.

SK 5xxE		Functions Connection	SK 51xP	
Designation Part No.	Product		Product	Designation Part No.
SK 510E-xxx-323-A 275 71x xxx				
SK 510E-xxx-340-x 275 72x xxx		Safe stop STO, SS1 1-channel		on board 275 291 xxx
SK 511E-xxx-323-A 275 77x xxx				
SK 511E-xxx-340-x 275 78x xxx				

Table 11: Functional safety as integrated function (on board)

### Information

The functional safety (STO, SS1) is described device-specifically in supplementary manuals.

For detailed information, please refer to the  5.1.1 "Manuals" supplementary manuals on the functional safety.

### 2.5.2 Customer units (SK CU5...)

For the SK 5xxP series, two functional extensions are available for the SK 530P and SK 550P advanced performance levels. These optional SK CU5... customer units are available in the functions:

SK CU5-STO functional safety	SK CU5-MLT encoder interface
STO, SS1 2-channel connection	STO, SS1 2-channel connection  TTL, SIN/COS, SSI, Hiperface, Endat, BISS

Illustration 2: SK CU5-STO customer unit

SK 5xxE		SK 5xxP		Customer unit	
Designation Part No.	Product	Product	Designation Part No.	Function Option	Designation Part No.
SK 530E-xxx-323-A 275 71x xxx			SK 530P-xxx-123-A 275 293 xxx	Functional safety	SK CU5-STO 275 298 000
SK 530E-xxx-340-x 275 72x xxx			SK 530P-xxx-340-A 275 293 xxx		
SK 535E-xxx-323-A 275 77x xxx			SK 550P-xxx-123-A 275 295 xxx	Encoder interface + Functional safety	SK CU5-MLT 275 298 200
SK 535E-xxx-340-x 275 78x xxx			SK 550P-xxx-340-A 275 295 xxx		
SK 540E-xxx-323-A 275 77x xxx			SK 530P-xxx-123-A 275 293 xxx	Encoder interface + Functional safety	SK CU5-MLT 275 298 200
SK 540E-xxx-340-x 275 78x xxx			SK 530P-xxx-340-A 275 293 xxx		
SK 545E-xxx-323-A 275 77x xxx			SK 550P-xxx-123-A 275 295 xxx	Encoder interface + Functional safety	SK CU5-MLT 275 298 200
SK 545E-xxx-340-x 275 78x xxx			SK 550P-xxx-340-A 275 295 xxx		

Table 12: Functional extensions/SK CU5... customer units

### Information

For the descriptions of the functional safety (STO, SS1) and the SK CU5... customer units, please refer to the supplementary SK 5xxP manual.

For detailed information, please refer to the supplementary BU 0630 5.1.1 "Manuals" manual.

## 2.6 Control and parametrisation options

The following overview table lists the SK TU3... technology units of the SK 5xxE, and compares them to the SK 5xxP control and parameterisation units.

### 2.6.1 Control and parameterisation units

SK 5xxE		Control unit Information	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
SK TU3-POT 275 900 110		PotentiometerBox 0 ... 100 %		Not available
SK TU3-CTR 275 900 090		ControlBox 4-digit 7-segment display		SK TU5-CTR 275 297 000
		ControlBox 5-digit LCD 7-segment display		
SK TU3-PAR 275 900 100		ParameterBox LCD screen Plain text display		SK TIE5-BT-STICK 275 900 120
		NORDCON APP + NORDAC ACCESS BT		

Table 13: Technology units SK TU3... control and parameterisation units

## 2.6.2 Accessories for the control and parameterisation units

SK 5xxE		Control unit Information	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
SK CSX-0 275 900 095		SimpleBox 4-digit 7-segment display		SK TU5-CTR 275 297 000
		ControlBox LCD, 5-digit 7-segment display		
SK PAR-3E 275 281 414		ParameterBox Installation LCD screen Plain text display		Version 4.8R0 and higher SK PAR-3E 275 281 414
SK PAR-3H 275 281 014		ParameterBox Handheld LCD screen Plain text display		Version 4.8R0 and higher SK PAR-3H 275 281 014
SK CSX-3E 275 281 413		SimpleControlBox Installation 4-digit 7-segment display		SK CSX-3E 275 281 413
SK CSX-3H 275 281 013		SimpleControlBox Handheld 4-digit 7-segment display		SK CSX-3H 275 281 013
SK SSX-3A 271 281 513		SimpleSetpointBox Handheld 4-digit 7-segment display		SK SSX-3A 271 281 513

Table 14: Accessories for the control and parameterisation units

### Information

The SK PAR-3H and SK CSX-3H handheld consoles are equipped with the connecting cable for the connection to the frequency inverter's communication or diagnostic interfaces.

### 2.6.3 Accessories for the control boxes

SK 5xxE		Control unit Information	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
SK POT1-1 278 910 120		Control box Handheld 3 m cable length 3-pole switch Potentiometer 0 ... 100%		SK POT1-1 278 910 120
SK POT1-2 278 910 140		Control box Handheld 20 m cable length 3-pole switch Potentiometer 0 ... 100%		SK POT1-2 278 910 140

Table 15: Accessories for the control boxes

## 2.7 Software

The following overview table lists the control and parameterisation software as well as the communication connection extension via Bluetooth to the NORDAC PRO.

### 2.7.1 Software and communication accessories

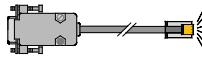

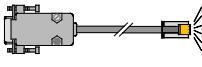

SK 5xxE		Information Connection	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
NORDCON Software Version 2.0 and higher		Software for controlling and parameterising NORD drive technology		NORDCON Software Version 2.8.3 and higher
RJ12-SUB-D9 278 910 240		Adapter cable RS232 communication RJ12 to SUB-D9		RJ12-SUB-D9 278 910 240
SK TIE4-RS232-USB 275 274 604		Connection set RS232 communication RJ12 - SUB-D9 / USB		SK TIE4-RS232-USB 275 274 604
NORDCON APP Software Version 1.0.30 and higher		Laden im App Store Mobile terminal devices JETZT BEI Google Play		NORDCON APP Software Version 1.1.0 and higher

## 2.9 Accessories

### 2.9.1 Braking resistors

External braking resistors are available as accessory components for the NORDAC PRO series.

Both NORDAC PRO frequency inverter types are implemented with an integrated brake chopper for dissipating the energy feedback (generated during dynamic braking) using an external braking resistor.

For these external braking resistors used for preventing overvoltage-related frequency inverter shutdowns, a differentiation is made between two different types and designs.

#### Design

- Chassis braking resistor
- Footprint braking resistor

##### 2.9.1.1 Chassis braking resistors

In the table below, the different SK BR2-... chassis braking resistors are assigned to the individual power ranges. The chassis braking resistor types/designs are identical for both device series.

The chassis braking resistors are subdivided into types and different designs. The chassis braking resistors or the resistor elements are integrated into housing cages and can be used almost universally. For thermal protection of the chassis braking resistor, these are equipped with an integrated thermostat (bimetallic switch as opener).

**Vertical design**

**Horizontal design**

**Illustration 7: Versions of chassis braking resistors**

The temperature contact can be connected via two terminals ( $4 \text{ mm}^2$ ) with one digital input of the frequency inverter and parameterised to, for example, one of the safety functions ("Disable voltage" or "Quick Stop").

The chassis braking resistors are UL certified and can also be installed outside the control cabinet due to their IP20 protection class version and for better heat dissipation. The chassis braking resistors must be connected to the frequency inverter via a separate connection cable – a shielded cable is recommended. The connection cable should be as short as possible.

## Information

Special attention must be paid to the type of assembly (vertical or horizontal). For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets".

### 400 V devices

SK 5xxE		Type Power range Data	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
SK BR2-100/400-C 278 282 040		Chassis braking resistor 3.0 ... 4.0 kW  100 Ω      100 Ω 400 W      400 W		SK BR2-100/400-C 278 282 040
SK BR2-60/600-C 278 282 060		Chassis braking resistor 5.5 ... 7.5 kW  60 Ω      60 Ω 600 W      600 W		SK BR2-60/600-C 278 282 060

SK BR2-22/2200-C 278 282 220		Chassis braking resistor 15.5 ... 22.0 kW  22 Ω      22 Ω 2200 W      2200 W		SK BR2-22/2200-C 278 282 220

**Table 24: Chassis braking resistors for 400 V devices**

### 2.9.1.2 Footprint braking resistors

In the table below, the different SK BR4-... footprint braking resistors are assigned to the individual power ranges and compared to those of type SK BRU5-.... The footprint braking resistor types/designs are different for both device series. Depending on the space available and the respective depth in the control cabinet, the footprint braking resistors for the SK 5xxE can be mounted flat or vertically (book size) next to the frequency inverter.

**SK 5xxE with SK BR4-xxx/xxx**

**SK 5xxP with SK BRU5-x-xxx-xxx**

**Illustration 8: Footprint braking resistor designs for size 2**

Both footprint braking resistor designs are UL certified and can also be installed outside the control cabinet due to their IP40 protection class version and for better heat dissipation. The footprint braking resistors' lead-out connection cables must be lengthened accordingly.

#### Information

The connection cable lengths and short-time powers are different for the device-specific footprint braking resistor types. For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets".

**230 V devices**

Table 26: Footprint braking resistors for 400 V devices

### Temperature monitoring accessories

For thermal protection of the SK BR4-... and SK BRU5-... braking resistors, a thermostat (bimetallic switch/opener contact) can be optionally installed directly on the resistor housing.

The type selection depends on the footprint braking resistor's assembly type.

SK 5xxE		Assembly type Data	SK 5xxP	
Designation Part No.	Product		Product	Designation Part No.
SK BR4/BRU5-... temperature monitoring 275 991 100		Book size 180 °C 2.5 A		SK BR4/BRU5-... temperature monitoring 275 991 100
SK BR4/BRU5-... temperature monitoring 275 991 200		Footprint 100 °C 1.6 A		

Table 27: SK BR4/BRU5-... temperature monitoring accessories

## 2.9.2 Line filter

Both NORDAC PRO series are equipped with an integrated EMC line filter. The compliance with standards for limit values of class A1/category C2 is guaranteed for shielded motor cable lengths < 20 m. For shielded motor cable lengths < 5 m, the class B/category C1 limit values are observed.

### Information

For the following SK 5xxP device types, the compliance with the declared class B1/category C1 limit values cannot be guaranteed.

- SK 5xxP-250-123-A ... SK 5xxP-550-123-A
- SK 5xxP-250-340-A ... SK 5xxP-550-340-A

For applications with longer motor cables or for compliance with the class B limit values, external line filters are available as accessory components.

For these external line filters used for reducing the emission of electromagnetic interferences, a differentiation is made between two different types and designs.

### Design

- Chassis line filter
- Footprint line filter

#### 2.9.2.1 Chassis line filters

In the table below, the different SK HLD ... chassis line filters are assigned to the individual power ranges for the SK 5xxE.

### Information

Optional chassis line filters for the entire SK 5xxP power range are available via the Getriebbau NORD sales department **only on request**.

**Illustration 9: NORDAC PRO SK 5xxE chassis line filter**

The SK HLD ... chassis line filters are UL certified and can also be installed outside the control cabinet due to their IP20 protection class version and for better heat dissipation. The chassis line filters must be connected to the mains connection and the frequency inverter via a separate connection cable – a shielded cable is recommended. The connection cables should be as short as possible.

## Information

Compliance with the wiring guidelines must be ensured when connecting. In the additional parameters, the pulse frequency should be set to the factory setting (6 kHz). For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets".

### 400 V devices

SK 5xxE		Type Power range Data	SK 5xxP

Table 28: Chassis line filters for 400 V devices

### 2.9.2.2 Footprint line filter

In the table below, the different SK LF2-... footprint line filters are assigned to the individual power ranges for the SK 5xxE. Footprint line filters are only available for a 3-phase mains connection. Depending on the space available and the respective depth in the control cabinet, the footprint line filters can be mounted flat or vertically (book size) next to the frequency inverter.

#### Information

Optional footprint line filters for the entire SK 5xxP power range are available via the Getriebbau NORD sales department **only on request**.

**Illustration 10: NORDAC PRO SK 5xxE footprint line filter**

The SK LF2-... footprint line filters are UL certified and can only be installed in the control cabinet due to their IP00 protection class version. The connection cable for the mains connection must be provided and should be as short as possible. The mains cable is connected using screw terminals. The footprint line filters must be connected to the frequency inverter's mains connection on the outgoing circuit side using the pre-assembled connection cables.

#### Information

Compliance with the wiring guidelines must be ensured when connecting. In the additional parameters, the pulse frequency should be set to the factory setting (6 kHz). For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets".

**400 V devices**

**Table 29: Footprint line filters for 400 V devices**

### 2.9.2.3 Footprint combined line filter

This combination of line filter with integrated mains choke in one housing is only available for a 3-phase mains connection. In the table below, the different SK NHD-... footprint combined line filters are assigned to the individual power ranges for the SK 5xxE. Depending on the space available and the respective depth in the control cabinet, the footprint combined line filters can be mounted flat or vertically (book size) next to the frequency inverter.

#### Information

Optional footprint combined line filters for the entire SK 5xxP power range are available via the Getriebbau NORD sales department **only on request**.

Illustration 11: Footprint combined line filter NORDAC PRO SK 5xxE

The SK NHD-... footprint combined line filters are UL certified and can be installed in the control cabinet due to their IP20 protection class version. The connection cable for the mains connection must be provided and should be as short as possible. The mains cable is connected using screw terminals. The footprint combined line filters must be connected to the frequency inverter's mains connection on the outgoing circuit side using the pre-assembled connection cables.

#### Information

Compliance with the wiring guidelines must be ensured when connecting. In the additional parameters, the pulse frequency should be set to the factory setting (6 kHz). For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets".

**Table 30: Footprint combined line filters for 400 V devices**

## 2.9.3 Chokes

### 2.9.3.1 Mains chokes

The mains chokes are located upstream from the frequency inverters and limit the input current to approximately the level of the NORDAC PRO output current.

In the following tables, the different mains chokes are assigned to the individual power ranges of both device series and compared to them.

**SK CI1-xxx/xxx-C for SK 5xxE**

**SK CI5-xxx/xxx-C for SK 5xxP**

**Illustration 12: NORDAC PRO mains chokes**

To reduce dangerous mains current peaks or mains voltage fluctuations, adaptive mains chokes may be used depending on the system. Mains feedback and the proportion of current harmonics will be considerably reduced.

SK CI1-... mains chokes are specified for a maximum supply voltage of 230 V or 480 V at 50/60 Hz.  
 SK CI5-... mains chokes are specified for a maximum supply voltage of 230 V or 500 V at 50/60 Hz.

Both types of mains chokes are UL certified and should always be installed in the control cabinet due to their IP00 protection class version. The mains chokes are connected using screw terminals.

#### Information

For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets".

Table 32: Mains chokes for 400 V devices

### 2.9.3.2 Motor chokes

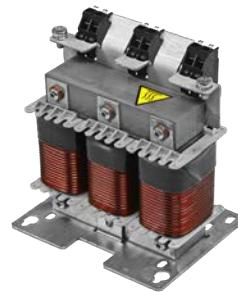

In case of long motor cables, motor chokes are installed between the frequency inverter and the motor for improving the EMC characteristics and the device protection. They reduce the motor cable's interference signals, or the cable compensation in case of longer motor cables.

In the following tables, the different motor chokes are assigned to the individual power ranges of both device series and compared to them.

**SK CO1-xxx/xxx-C for SK 5xxE**

**SK CO5-xxx/xxx-C for SK 5xxP**

**Illustration 13: NORDAC PRO motor chokes**

The SK CO1-... motor chokes are specified for a maximum supply voltage of 460 V at 50/60 Hz. The SK CO5-... motor chokes are specified for a maximum supply voltage of 500 V at 50/60 Hz.

Both types of motor chokes are UL certified and should always be installed in the control cabinet due to their IP00 protection class version. The motor chokes are connected using screw terminals.

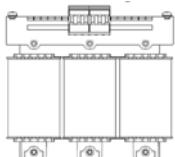

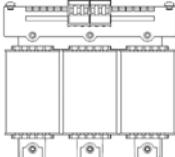

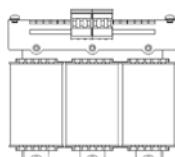

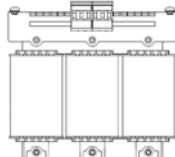

#### Information

All available motor chokes are only rated for a pulse frequency of 3 to 6 KHz and an output frequency of 0 to 120 Hz. The parameterisation is done under the additional parameters in the frequency inverter.

For detailed information, please refer to the technical information  Chapter 5.1.2 "Technical information/Data sheets" and the 5.1.1 "Manuals" manuals.

### 2.9.3.3 Link circuit chokes

The link circuit chokes are connected to the frequency inverter's DC link circuit and reduce the frequency inverter's network loads inherent to its functional principle.

The SK DCL-... link circuit chokes are only available for the SK 5xxE from power size  $\geq 45$  kW.

#### Information

Optional link circuit chokes for the entire SK 5xxP power range are currently **not** available from Getriebbau NORD.

Illustration 14: SK DCL-950/xxx-C NORDAC PRO SK 5xxE link circuit chokes

The SK DCL-... link circuit chokes are UL certified and should always be installed in the control cabinet due to their IP00 protection class version. The link circuit chokes are connected on both sides using ring cable lugs.

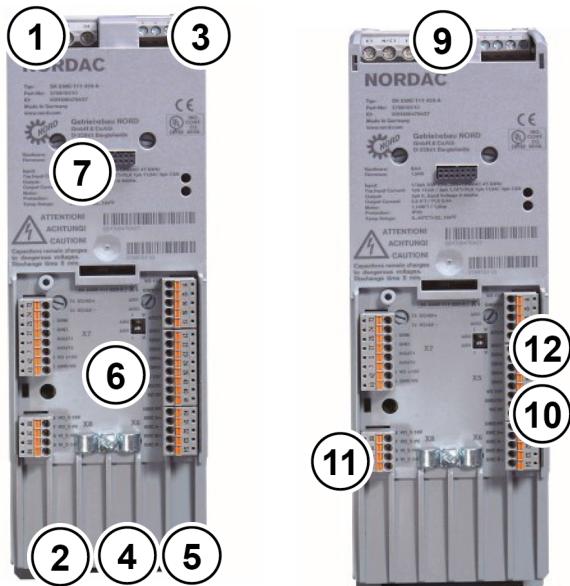

## 3 Electrical connection

### 3.1 SK 5xxE series

#### 3.1.1 Overview SK 5xxE terminal blocks

Depending on the size, the connection terminals for the power cables and the control cables are located in different positions. According to the configuration of the frequency inverter, terminals are not present.

**Sizes 1 to 4**

(1)	Mains connection	L1, L2/N, L3, PE	X1
(2)	Motor connection	U, V, W, PE	X2
(3)	Test multi-function relay	1 - 4	X3
(4)	Braking resistor	+B, -B	X2
(5)	DC link circuit	-DC	X2

## 4 Dimensions

### Information

In the Dimensions chapter, only those products, options and accessory components are listed that can be used differently with the NORDAC PRO product series.

### 4.1 NORDAC PRO

In contrast to the SK 5xxE that must be installed using two supplied wall-mounting brackets for the sizes 1 - 4, the SK 5xxP frequency inverters are installed directly on the back in a control cabinet.

Illustration 20: NORDAC PRO

## 4.2 Frequency inverter

### Dimensioning

The following tables and figures compare the dimensions [mm] of both device series regarding their power sizes.

#### 4.5.9 NORDAC PRO link circuit chokes

##### Information

Link circuit chokes for the NORDAC PRO SK 5xxP device series are not available.

## 5 Additional information

In addition to this migration guideline, further information can be found in different categories on the homepage [www.nord.com](http://www.nord.com).

### 5.1 Further documentation

Further documentation on the products mentioned here are available as a supplement to this migration guide.

### 5.1.1 Manuals

For basic information on NORDAC PRO, please refer to the respective main manual of the current device series (e.g. BU 0500 for SK 500E).

For further information on field-specific Ethernet-based bus systems (e.g. PROFINET IO®), please refer to the respective supplementary manuals e.g. BU 2400 for PROFINET IO®).

For further information on control and parameterisation units (e.g. SK TU3-PAR or SK PAR-3E), please refer to the BU 0040 manual for control and parameterisation units.

For further information on the accessory components (e.g. chokes, braking resistors and line filters) please refer to the NORDAC PRO manuals (BU 0500, BU 0505 and BU 0600).

If you require further information on the additional components, please contact the Getriebbau NORD GmbH & Co. KG service/technical support.

Further manufacturer-specific data sheets may be provided on request.

### 5.1.3 Product flyers/brochures

For summarised product information on the NORDAC PRO SK 5xxE and SK 5xxP frequency inverters, the different bus interfaces, options and the corresponding accessory components (e.g. chokes, braking resistors or line filters), please refer to the assigned product flyers.

Document	Designation
 <a href="#">E 3000</a>	Catalogue NORDAC electronic drive technology

 <a href="#">F 3060</a>	Flyer NORDAC PRO SK 500P control cabinet inverter
 <a href="#">Technical information</a>	Training manual - Technical information

### 5.1.4 Spare parts lists

Among others, the product spare parts lists are available for planning and migration of the NORDAC product components. An overview of the available spare parts lists can be found on our homepage at Documentation:

[Spare parts lists](#)

### 5.1.5 Certificates

The certificates of the below-mentioned categories are available on the homepage at [Certificates](#) (Main page ⇒ Documentation ⇒ Certificates).

#### Information

You can gain fastest access to the certificates via the rapid access and the selection of the respective category:

- Electronic drive technology
  - Declaration of Conformity
  - Safe function
  - ATEX
  - CE
  - UL
  - CSA
  - RoHS
-

## 5.2 Software

The below-mentioned software products are available free of charge on the homepage at [Software](#) (Main page ⇒ Documentation ⇒ Software).

### Information

Getriebbau NORD GmbH & Co. KG does not accept any warranty for the installation and usage of the following software products.

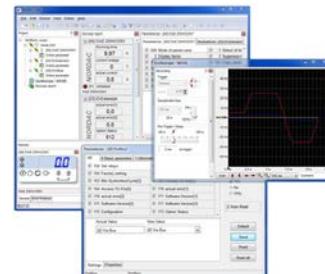

- NORDCON, NORDCON APP
- NORDAC options
- Device master data for field bus systems
- NORD TIA Portal standard modules
- NORD S7 Siemens standard modules
- NORD SISTEMA libraries
- ePLAN MACROS

### 5.2.1 NORDCON

For programming and operation of NORDAC electronic drive technology, computer-based software is available for download at [www.nord.com](http://www.nord.com).

The NORDCON software comprises the parametrisation of motor starters, frequency inverters as well as technology and customer units.

The software includes the following features:

- User-friendly parametrisation
- Simple commissioning of the drive
- Drive analysis via oscilloscope function
- PLC programming of the drive-based, integrated PLC 61131-3
- PLC programming, structured text (ST), PLCoften Motion Control library

For further information, please refer to the link listed below.

Software	Description	Version
<a href="#">NORDCON</a>	The NORDCON software is a program for computer applications for controlling and parameterising frequency inverters from Getriebbau NORD GmbH & Co. KG.  The communication with electronic drive technology devices is realised via the computer's serial SUB-D9 interface or a normal USB adapter via the USB interface.	≥ 2.7

Table 51: NORDCON software

### 5.2.2 NORDCON APP

For the mobile commissioning and service solution of NORDAC electronic drive technology devices, a software app for mobile terminal devices is available for download at [www.nord.com](http://www.nord.com).

The NORDCON APP is a dashboard-based visualisation

- for drive monitoring and fault diagnosis
- Parameterisation with help function + rapid access to parameters
- Oscilloscope function for drive analysis
- Backup and recovery function for simple handling of drive parameters

This software-based APP is available for iOS and Android.

For further information, please refer to the links listed below.

Software	Description	Version
<a href="#">NORDCON APP</a>	<p>NORDCON APP software is an application for mobile terminal devices for commissioning and service analysis of NORDAC devices from Getriebbau NORD GmbH &amp; Co. KG.</p> <p>The communication with electronic drive technology devices is realised with NORDAC ACCESS BT via a wireless Bluetooth connection.</p> <p> <a href="#">QUICK-START (S9090)</a></p>	≥ 1.0

Table 52: NORDCON APP

### 5.2.3 NORDAC ACCESS BT

NORDAC ACCESS BT is the mobile Bluetooth access for electronic drive technology devices from Getriebbau NORD GmbH & Co. KG. It is used for wireless connection of devices to a mobile terminal device.

Monitoring, parameterisation and analysis of the connected device can be carried out using the free NORDCON APP software.

Furthermore, NORDAC ACCESS BT can be used to exchange parameter data

- between two identical devices
- via an USB port to a computer.

For further information, please refer to the links listed below.

Product	Description	Version
<a href="#">NORDCON APP</a>	Monitoring, parameterisation and analysis of NORD electronic drive technology devices via Bluetooth (mobile terminal device with NORDCON APP software required). <ul style="list-style-type: none"> <li>• Integrated data storage for parameter data exchange</li> <li>• Mechanical switch to activate write protection (LOCK)</li> <li>• RJ12 plug connector for connection to the device (RS485 communication)</li> <li>• USB Type A plug connector for connection to a computer</li> <li>• Three multi-colour LEDs as status and operation indicators</li> <li>• Two operating keys (data transfer for upload and download)</li> </ul> <a href="#"> QUICK-START (S9090)</a>	≥ V1.0R1

Table 53: NORDAC ACCESS BT

### 5.2.4 Field bus files

For planning and programming the different field bus systems and bus interfaces, several software files for integration into different automation systems are available for download for the NORDAC PRO device series at [www.nord.com](http://www.nord.com).

The NORDAC options comprise the manufacturer and device-specific information and parameters required for connecting the NORD products' bus system-specific field bus systems and bus interfaces to the respective used bus system.

For further information, please refer to the link listed below or to the assigned "readme" text files on the homepage.

Software	Description	Version
<a href="#">Field bus files</a>	<p>NORDAC field bus files are software files that are assigned to bus systems (such as PROFIBUS DP® – GSD, CANopen® – EDS, EtherCAT® – XML, etc.) and provided for planning system-specific automation projects with frequency inverters from Getriebbau NORD GmbH &amp; Co. KG.</p> <p>The software files are assigned to the available field bus systems of the different NORDAC device series.</p> <p>The implementation of the software files is done via integration into the control or automation software of the respective bus system manufacturer.</p>	Depends on the software and system

### 5.2.5 S7 modules

For PLC controls from SIEMENS, standardised S7 modules are available for planning and migration of the NORDAC product components. These manufacturer-specific modules can be imported into the Simatic hardware configurator.

For support, NORD provides modules that contain the relevant information for the device series.

An overview of the available S7 modules can be found on our homepage at Software:

[NORD S7 standard modules](#)

### 5.2.6 TIA portal

For PLC controls from SIEMENS, standardised modules are available for planning and migration of the NORDAC product components. These manufacturer-specific modules can be imported into the TIA planning tool.

For support, NORD provides a library that contains the relevant information for the device series.

An overview of the available modules can be found on our homepage under Software:

[NORD TIA standard modules](#)

## 5.2.7 NORD SISTEMA - Libraries

Among others, the Windows-based software assistant SISTEMA is available for planning and migration of the NORDAC product components. These manufacturer-specific modules can be imported into the SISTEMA software assistant. It is used for the safety evaluation of controls in the context of DIN EN ISO 13849-1.

Safety functions that have been realised or are to be realised can be modelled and evaluated. The results are the reliability values and the achieved performance level (PL).

For support, NORD provides a library that contains the relevant key figures for the calculation.

An overview of the available modules can be found on our homepage under Software:

[NORD SISTEMA - Libraries](#)

## 5.2.8 ePLAN macros

For the planning and creation of circuit diagrams, the respective ePLAN macros are available for download at [www.nord.com](http://www.nord.com) for NORDAC electronic drive technology products. The macros allow an easy integration of frequency inverters and options into your circuit and wiring diagrams.

The macros contain files in .edz format. In ePLAN, these can be converted into .dxf or .pdf files.

For further information, please refer to the link listed below.

Software	Description	Version
<a href="#">ePLAN macros</a>	ePLAN macros from NORD are available for planning and documentation of electronic automation projects for frequency inverters from Getriebebau NORD GmbH & Co. KG.	ePLAN P8

## 5.3 CAD data

### 5.3.1 3D model

The STEP 3D models of the frequency inverters and some additional components can be automatically generated via the homepage under the CAD data tab. Different formats like .dfx, .igs, .obj, .sat or .stp are available for download.

In case of any queries, please contact the Getriebebau NORD GmbH & Co. KG service/technical support.

### 5.3.2 Outline drawings

The products' outline drawings are available for download in .dxf format.

### 5.3.3 Dimensioned drawings

The products' dimensioned drawings are available for download in .pdf and .dxf formats.

## 5.4 myNORD portal

Among others, the myNORD portal is available for configuration and planning of the NORDAC product components.

It is possible to view your recent configurations and orders as well as quickly access the most important information regarding your products and services via your account overview.

Further information on the portal can be found in the portal overview on our homepage:

[myNORD dashboard](#)

You can find the following categories and get information via the portal:

- Product Selection
- Orders & Quotes
- Online Service
- Portal
- E-shop
- Account

### 5.4.1 E-shop

In the e-shop, different functions are available for planning and migration of the NORDAC product components. An overview of the available tools can be found on our homepage at myNORD:

[E-shop](#)

Here you can find information about the categories

- Spare part identification
- Parts catalogues
- Part number search

## 5.5 Product configurator

Among others, the product configurator is available for planning and migration of the NORDAC product components. Please find the planning aids using the configurator on our homepage at:

[NORD product configurator.](#)

The product configurator can be used to generate the available drawings and CAD files in different formats.

- 3D models
- Outline drawings
- Dimensioned drawings

## 6 Appendix

### 6.1 List of abbreviations

Abbreviations used in this guide:

Abbreviation	Meaning
3E	Installation
3H	Handheld
AG	Absolute encoder
AIN	Analogue input
AOUT	Analogue output
AS (AS1)	AS-Interface
BT	Bluetooth stick
BW	Braking resistor
CAD	Computer-aided drafting
CAN	Controller Area Network
CAO	Controller Area Network, higher protocol
CI	Mains choke type/designation
CO	Motor choke type/designation
CSX	SimpleControlBox
CTR	ControlBox
CU	Customer unit
DCL	Link circuit choke type/designation
DEV	DeviceNet
ECT	EtherCAT
EIP	EtherNet/IP
EMC	Electromagnetic compatibility
FI	Frequency inverter
HLD	Chassis line filter type/designation
HTL	High-Threshold Logic
IBS	InterBus
IP	Internet protocol
IP	Protection class
I/O	Input, Output
LCD	Liquid-crystal display
LED	Light-emitting diode
LF2	Line filter type/designation
NHD	Footprint line filter type/designation combined filter
PAR	ParameterBox
PBR	PROFIBUS DP
PNT	PROFINET IO
POL	POWERLINK
POS	POSICON
POT	PotentiometerBox
RS232	Serial 232 interface

Abbreviation	Meaning
RS422	Serial 422 interface
RS485	Serial 485 interface
SH	Safe stop
SK	Schlicht & Küchenmeister
SIN/COS	Sine/Cosine encoder type
SS1	Safe Stop 1 time-controlled
SSI	Synchronous Serial Interface
STO	Safe Torque Off
TI	Technical information/Data sheet
TTL	Transistor-transistor logic
TU	Technology unit
UB	Footprint
UL	Certification
USB	Universal serial bus
USS	Universal serial interface

## 6.2 Technical support

For further information on these documents or other potential applications, please contact the Getriebbau NORD GmbH & Co. KG [Service](#).

Further required information or software files (e.g. special software versions or firmware for software updates) may be provided to the user on request after technical consultation.

## 6.3 Service notes

For service/repair cases please contact your NORD Service contact person. You will find your contact person listed on your order confirmation. Additionally you will find further possible contact persons using the following link: <https://www.nord.com/en/global/locatortool.jsp>.

When contacting our technical support please have the following information available:

- Device type (name plate/display)
- Serial number (name plate)
- Software version (parameter P707)
- Information regarding accessories and options used

If you would like to send the device in for repair please proceed as follows:

- Remove all non-original parts from the device.  
NORD accepts no liability for any attached parts such as power cables, switches or external displays.
- Back up the parameter settings before sending in the device.
- State the reason for returning the component/device.
  - You can obtain a return note from our web site ([Link](#)) or from our technical support.
  - In order to rule out the possibility that the cause of a device fault is due to an optional module, the connected optional modules should also be returned in case of a fault.
- Specify a contact person for possible queries.

### Information

#### Factory settings of parameters

Unless otherwise agreed, the device is reset to the factory settings after inspection or repair.
