

NEMA & IEC adapters

Dimensional supplement

Motor adapters

NORD provides both NEMA and IEC adapters with various options and designs. Consult NORD for exact adapter being provided. These adapters allow for the attachment of NEMA and IEC flanged motors.

Automatic lubricator

Some double-reduction gearboxes sizes SK62, SK6282 and larger and triple reduction gearboxes SK73, SK6382, SK9072.1 and larger with NEMA C-face or IEC adapters larger than 250TC/IEC160 are provided with an automatic lubricator. Automatic lubricators contain 120 cm³ (4 oz) of grease that is released over time to the outboard adapter bearing. With 8 hours/day operation the lubricator will last 12 months. The automatic lubricator is designed for ambient temperatures between 32°F (0°C) and 104°F (40°C). If the ambient temperature differs from the specified standard value for longer periods of time, special lubricators should be used. Please enquire.

Installation position M2 or M4

The automatic lubrication canister is not recommended for applications where the motor is installed vertically. For alternate solutions, please consult NORD with “the application details.”

The smaller gear units with NEMA / IEC adapters up to size SK 52 and SK 5282 (for two-stage gear units) and up to size SK 63, SK 6382 and SK 9052.1 (for three-stage gear units) have bearings that are sealed and lubricated for their service life. These are maintenance-free. There are also “A” versions of the NEMA / IEC adapters that have bearings that are sealed and lubricated for their service life. These are also available with re-lubrication and auto lubricators as options.

The NEMA / IEC adapter coupling may not be fail-safe. With hoists, lifts and other applications where there is a danger of personal injury, special measures are required. Please enquire.

We recommend direct mounting of the motor

In contrast to the directly mounted motors, the NEMA / IEC adapter has an additional shaft coupling and additional bearing seats. This results in higher no-load losses in comparison with directly mounted motors. We recommend direct mounting of the motor, as this not only provides technical advantages, but also offers price advantages.

Maximum permitted motor weights

Ordering is Easy With myNORD Online Tools!

- ▶ Obtain drawing files direct from quote configuration
- ▶ Effortlessly select & configure customized drive solutions
- ▶ Create quotes with account-specific net pricing
- ▶ Order-specific documentation
- ▶ 24/7/365 order tracking
- ▶ Select and order spare parts
